

Flexo® Brass Beauty Ideal for Both Looks & Functionality

Techflex® FLEXO® BRASS (MBB) can be a useful and beautiful part of your next project. The decorative features of brass are obvious, but many people don't know that brass is actually an alloy of copper and zinc.

Our brass is designed for both looks and functionality and can be adapted to create custom hoses and brake lines. Designers and engineers may also use our brass braid for its natural antimicrobial and germicidal properties. Contact with our Brass Braid can kill harmful microorganisms within minutes.

Flexo® Brass Braid has been used in "steampunk" creations of all kinds to bring the hoses of the industrial revolution back to life today.

- **Perfect for Decorative Applications**
- **Antimicrobial And Germicidal Properties**
- **Provides Form And Functionality**
- **Melt Temperature: 1,650°F-1,720°F (900°C-940°C)**
