

ABRASION/MECHANICAL

# Expando<sup>®</sup> M

## Product Highlights

- Highly expandable
- Excellent abrasion resistance
- Excellent flexibility
- Attractive appearance

## Typical Applications

- Electrical distribution systems
- Hoses
- Tubing

**Expando<sup>®</sup> M** is a flexible, slightly expandable sleeve specifically designed for abrasion protection of electrical distribution systems, tubing and hoses.

Braided with polyester multifilaments, Expando M is lightweight and rugged with an attractive appearance. A high coverage ratio contributes to the product's aesthetic appeal and makes it suitable for visible applications.

Expando products are tough, lightweight oversleeves used to protect cable assemblies, hoses and wire harnesses from chafing, cutting and abrading. The open-braid construction of Expando products enables each size to expand to fit several application shapes and diameters. This open-textile construction also makes them highly flexible and resistant to trapping water, heat and humidity.

Our manufacturing sites are certified ISO 9000, QS 9000 or ISO/TS 16949 and ISO 14001
