Expando® TCP

ABRASION

Product Highlights

- Operating temperature
  -50°C to +150°C
  (-58°F to +302°F)

- 1 : 2 expansion ratio

- Halogen-free

- Excellent abrasion resistance

- Easy installation over long lengths

Expando® TCP is an expandable braided sleeve manufactured from modified polyester monofilaments. It is designed for the protection of tubing and the maintenance of wire and cable bundles.

This product has a highly expandable structure which allows for easy installation over long lengths even after the fitting of end connectors. Expando TCP has a high expansion ratio which enables a large number of diameters to be covered with a limited range of sizes.

The properties of the monofilament ensure excellent performance of this sleeve in the most diverse and aggressive environments. The product is used in a wide range of industries including medical and electrical / electronic devices.

Our manufacturing sites are certified ISO 9001, IATF 16949, or AS/EN 9100, ISO 14001 and ISO 45001 (Selected Sites)
