

ABRASION/MECHANICAL

ProGard®

Product Highlights

- Operating temperature up to +125°C (+260°F)
- Enhanced abrasion resistance
- MSHA acceptance: IC - 171/1
- Available in black only
- High coverage for maximum protection
- Fluid resistant
- Custom printing available

Our manufacturing sites are certified ISO 9001, ISO/TS 16949, or AS/EN 9100, and ISO 14001

PROGARD_08262014

ProGard® is a durable, woven nylon sleeve constructed of high denier nylon yarn. ProGard provides enhanced abrasion protection over hose assemblies, cables, wires and other applications where rugged environments may cause wires and hoses to be chafed and damaged.

ProGard's dense construction provides maximum coverage of the hoses and cables it protects, assuring enhanced abrasion and cutthrough resistance. These properties extend the service life of the protected component, and provide the cost savings associated with decreased hose replacements.

ProGard is used in a wide range of industries including hydraulics, mining, construction & agriculture.

ProGard installed on a hydraulic hose
