

Product Highlights

- Operating temperature from -60°C to +200°C (-76°F to +392°F)
- Good fluid resistance
- Easy to install
- Aesthetic solution
- Self-amalgamating
- Local protection
- A-A-59163
- **Shelf life:** One year after date of manufacture

Our manufacturing sites are certified ISO 9001, IATF 16949, or AS/EN 9100, ISO 14001 and ISO 45001 (Selected Sites)

Tenneco Systems Protection offers a range of silicone elastomer tapes, which self-amalgamate at ambient temperature.

The elongation of tape 50N and 51N ranges from 300 to 500%.

After several hours at ambient temperature, the surface of these tapes sticks together when light pressure is added.

These tapes are used for sealing, connecting and finishing the cut ends of sleeves exposed to high temperature. These products can also be used to provide local protection to connection accessories and other wire harness components.
