

Product Highlights

- Operating temperature up to +200°C (+392°F)
- Excellent radiant and convective heat protection
- Self-wrapping design allows for break-outs
- Lightweight, flexible & easy to install
- Fluid and chemical resistant

Typical Applications

- Engine compartment applications
- Wire harnesses
- Brake & fuel lines
- Tube, hose & cable assemblies

Therm-L-Wrap™ is a self-wrapping, reflective sleeve designed to provide thermal protection for both radiant and convective heat applications. Composed of a woven fiberglass base fabric and a lamination of aluminum foil, the product can withstand convective heat soaks up to +200°C (+392°F) and simultaneously protect critical components from radiant or reflected heat.

The self-wrapping design of Therm-L-Wrap allows for quick and easy installation with a self-sealing adhesive reinforcement for permanent closure. The adhesive strip acts as a barrier to dirt and fluids while maintaining the full integrity of the finished aluminized sleeve.
