### **SECTION 2: COMPOSITION/INFORMATION ON HAZARDOUS INGREDIENTS**

Bentley-Harris Roundit 2000 is a lightweight, flexible, self-wrapping oversleeve designed to provide mechanical protection from chafing, cutting and abrading. Its design allows flexibility for quick and easy bundling of wire and cable assemblies without disturbing connectors or fittings. It is a woven blend of polyester monofilaments and multifilament yarns which gives it a rugged yet smooth texture and appearance. It has many applications in the aeronautical, marine, electronic and general manufacturing industries.

Although several of the ingredients used to formulate this product may be hazardous in the raw state, the manufacturing process results in a solid, infusible form, binding and otherwise, rendering the product inert. The constituents identified below may be present in quantities greater than 1% (0.1% for carcinogens) that may be release from the product by overheating, burning, machining, abrasion, or riveting.

This information provides the minimum criteria for safe usage and handling of this product. Companies using this product should develop their own occupational health program to protect employees from injury or adverse health effects.

**Special Fire Fighting Procedure:** Wear self-contained breathing apparatus when extinguishing. Hazardous decomposition products are generated in fire conditions.

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

Scrap monofilament may present a slipping hazard. Sweep up and dispose of according to all federal and state disposal procedures. If dust is generated during machining, abrading or riveting, remove dust by vacuuming or wet mopping. Vacuums should be equipped with HEPA filters. Do not use compressed air to blow dust from surfaces.

#### SECTION 7: HANDLING AND STORAGE

If dust is generated while shipping product, remove dust by vacuuming or wet mopping. Vacuums used for this purpose should be equipped with HEPA filters. Do not use compressed air to blow dust from surfaces.

#### SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

**Ventilation Protection:** Any operation which may produce dust, including machining, grinding, riveting, or abrading this product, should be adequately exhausted to prevent inhalation of dust.

**Respiratory Protection:** Use a NIOSH-approved respirator if there is a potential for exposure to dust, vapor, or fume exceeding PELs or TLVs. (See 29 CFR 1910.134, OSHA Respiratory Protection Standard).

**Skin Protection:** If skin irritation occurs, gloves and other protective garments may be worn.

**Eyes:** Wear safety glasses or goggles, as necessary, if dust exposure is possible.
